

NTB

CCC conducted GHG Assessments for three main offices and ten branches of NTB, one of Sri Lanka's leading banks. The assessments were conducted in compliance with the GHG Protocol and ISO 14064-1 Standard.

For the main offices of NTB, all three Scopes were taken into consideration, and the Bank was able to demonstrate its commitment to sustainability by obtaining CarbonConscious® Certifications for each. This continuing multi-year engagement with comprehensive GHG Assessments also include customised Carbon Management Plans to minimise carbon emissions.
