

Sheraton Maldives

CCC was commissioned for this project as a part of the resort's energy and cost reduction strategy. The CCC Team carried out a detailed Energy Audit of the resort operations, and presented a comprehensive report detailing the resort's energy balance, highlighted key areas of inefficiencies and provided suggested solutions for energy reduction measures. The report also evaluated the resort's energy consumption pattern, its energy management and accounting practices, the daily load profile, and provided a detailed list of opportunities for Energy Performance Indicator improvements.

A complete GHG Assessment was also carried out encompassing Scope 1, 2 & 3 Emissions. The highest emissions sources were identified and linked to energy reduction measures. A comprehensive Water Audit was carried out as well, with a calculation of the cost of water consumption within the premises.
