

“World’s FIRST and ONLY WaterNeutral® Apparel Factory”

Linea Aqua

Linea Aqua started measuring their environmental impact back in 2012, and their Hanwella Factory became the World's FIRST WaterNeutral® Apparel Factory as a result of this journey. Already equipped with CarbonConscious®, WasteConscious® and BiodiversityConscious® Certifications as well, the factory has implemented comprehensive strategies and plans to effectively monitor and manage their overall impact, and has been able to achieve significant cost savings over the years. CCC used the 5R Framework for the Hanwella Factory of Linea Aqua to become the **FIRST** WaterNeutral® apparel manufacturer in the world.
