

*“Sri Lanka’s LARGEST
Bank to obtain ISO
14064-1 Certification”*

Bank of Ceylon

BOC was the first State-owned Bank to obtain ISO 14064-1 Certification for its organisational operations following a comprehensive GHG Assessment that included its **643 Service Units**, **10 Province Offices** and its iconic **Head Office**. This comprehensive and large-scale assessment looked at emissions sources from Scopes 1 and 2 that included generator fuel, owned vehicles, fugitive emissions and purchased electricity. Several key recommendations to mitigate the environmental impact of the Bank were also suggested, and CCC continues to work closely with the BOC Sustainability Team to help implement these.

This assessment was conducted and independently verified to award BOC with the ISO 14064-1:2018 Certification by The Sustainable Future Group.
