

# Closely

Founded by Tove Langseth and Filip Nelson, Closely is a Swedish brand that creates underwear and sportswear for women. They seek to create the most functional products that create a superior sense of freedom to all those who wear it, while minimising the negative impact their products have on the environment.

Cosely became a Carbon Neutral company as they offset the emissions from its Hong Kong and Sweden Offices by financing an international carbon offset project. This was achieved following the conduct of a Comprehensive GHG Assessment by CCC that included emissions from Categories 1-5 that followed internationally recognised standards such as the WBCSD/WRI GHG Protocol and ISO 14064-1 Standard, which are also compliant with the Carbon Disclosure Project.
