

A SNAPSHOT

- * The Sri Lankan Village themed restaurant of Cinnamon Grand Colombo, Nuga Gama retained CCC to conduct a GHG assessment and offset its entire carbon footprint to be in line with world standards for carbon neutrality.

NUGA GAMA Asia's 1st CarbonNeutral® Venue

Take a step towards preserving for the future by making a change today. Stroll through Sri Lanka's only 'village in the city', down the narrow gravel path, across the small paddy field with the friendly scarecrow, by the little village 'kade' and across the lush vegetable patches, making your way under the shady branches of the 200 year old Nuga Tree. Sit down and order a fine feast of traditional Sri Lankan cuisine made on fire hearths by rural women folk and savour each bite knowing that you are partaking in an experience that gives back to the environment, that cares about the future, that doesn't cost the earth.

77, Galle Road, Colombo 3
Tel: 011 249 7203

THE OUTCOME

- * A detailed GHG assessment was carried out by CCC, which provided a comprehensive report of the carbon emissions of Nuga Gama.
- * The footprint calculation then allowed CCC to make the necessary purchase of Carbon Offsets from recognised sources for their entire footprint in order to certify them as carbon neutral, thereby making the client, Asia's FIRST CarbonNeutral® Venue
