

*“World’s **FIRST**
CarbonNeutral®
Apparel Group of
Companies”*

Star Garments Group

CCC worked with the Star Garments Group (a **Komar** company), a leader in specialised apparel sourcing, design and manufacturing to assess the Greenhouse Gas (GHG) emissions of its **14 facilities** located in Sri Lanka. This comprehensive GHG Assessment was compliant with the Carbon Disclosure Project, CarbonNeutral Protocol and followed the guidelines of the internationally recognised GHG Protocol and ISO 14064-1 Standard.

The group was subsequently certified as CarbonNeutral®, and became the **FIRST** group of companies in the global apparel sector to achieve this status.

“We as a company engaged in the apparel industry basically operates as B2B business with no dealing with the end consumer. But these days end consumers tend to be more concerned on how products are manufactured. Customers look to purchase goods manufactured in an ethical and sustainable manner.. Businesses are the main reason for carbon emission which is now a growing concern among the masses since global warming is affecting the whole world. As businesses, we have to do everything within our power to help alleviate global warming.”

A. Sukumaran - Managing Director, Star Garments
