

*“Asia's FIRST  
CarbonNeutral®  
Vehicle Fleet”*

## Walkers Tours

History was made in 2012 when Walkers Tours' core business element – their vehicle fleet – became the **FIRST in Asia** to go CarbonNeutral®, and to date, remains the only company in their sector in Sri Lanka to hold this status. This significant effort in environmental consciousness and the reduction of their operational impact on global emissions was recently recognised by the developer of The CarbonNeutral Protocol, Natural Capital Partners of the UK, who presented their long-standing global climate champions with special commemorative plaques. The assessment was conducted by CCC, who have assisted and directed Walkers Tours from the beginning of their sustainability journey in managing and mitigating the operational emissions of their vehicle fleet.

*“When we first commenced on our journey with CCC, we understood the need for sustainable practices in the tourism industry. Protection of our environment and people are part of our corporate DNA, and they are vital to the global economy and important in achieving our business goals”.*

**Vasantha Leelananda - Executive Vice President and Sector Head**
